

# Calla TR-521

## Description

Calla TR-521 is a clear, viscous, heavy duty liquid cleaner.

## Application

Calla TR-521 was developed specifically for cleaning and brightening jet engine thrust reversers and cowlings during overhaul or repair.

After removal from the aircraft, spray Calla TR-521 full strength to completely cover thrust reverser, or other parts. No precleaning is necessary.

After approximately 15-30 minutes, rinse using one of the following, in order of preference:

- A) Steam Rinse
- B) High Pressure Warm Water
- C) Air and Water

## Physical Properties

## MilSpec

## Other

## Features

Calla TR-521 conforms to Douglas C.S.D.-1 requirements for immersion Corrosion Test, Cadmium Removal Test and Hydrogen Embrittlement Test

When used as directed, will not harm aluminum, magnesium, cadmium, chromium, stainless, high strength steels or titanium.
