

Zip Strip 125

Description

Zip-Strip™ 125 was designed specifically for removal of wet, waxy and/or dry film CIC's (corrosion inhibiting compounds). The material is water rinse able and is very effective even after short dwell time. The product is extremely effective on a wide range of aviation soils such as MoS2 grease, hydraulic fluid, wax and carbon deposits. The product can be used throughout the airframe without concern for damage to paint, sealants, or acrylic surfaces.
