

Formit[®]-18 Aerosol Extension Tube Kit

Description:

The **Formit[®]-18 Extension Tube Kit** was developed to assist in the application of our aerosol products including our corrosion inhibiting products such as **Noxit[®] 86**, **Cor-Ban[®] 22**, **Cor-Ban[®] 23**, and **Cor-Ban[®] 35** as well as the greases, such as **D-5933NS**. Difficult to access areas in aircraft structures present some challenges where application of product is critical.

Application:

The 18" long extension tube and aluminum sleeve can be formed into a variety of angles to allow access into recessed areas, and will allow for a reverse spray, such as up and underneath the edge of a stinger or channel, if needed.

Features:

We now offer several versions of the **Formit[®]-18** to enhance specific application requirements. The **Formit[®]-18 Extension Tube** will become your unique tool to solve application problems that may include voids of coverage or dramatic flooding and over application. For best results, sharp angles should be achieved by carefully bending the tube around a piece of pipe or the body of the aerosol can to ensure a non-crimped passage for material flow. The tube can be reshaped, but we suggest that you re-use the tube that has been shaped to solve your particular application concerns.

Specifications:

The **Formit[®]-18** consists of a pre-assembled female actuator, 18" length of flexible plastic tubing, with a 12" length of aluminum sleeve.

The following versions of the **Formit[®]-18** will allow for accurate application of our products; the part number for a case of each **Formit[®]** is included for ordering:

Formit[®]-18-F (006224):

Allows for a full fan spray with a forward projection and has a blue shrink tube for identification
NSN: 4730-01-612-9914 (12 Per Case).
NSN: 4730-01-661-8773

Formit[®]-18-180 (006226):

Allows for a 180 Degree fan spray with a verticle projection and has a black shrink tube tip for identification.

Formit[®]-18-360 (006227):

Allows for a full circle 360 Degree fan spray with a vertical projection and has a white shrink tube tip for identification
NSN: 6850-01-492-2942 (12 Per Case).

Formit[®]-18-STD-FOG (008352):

Allows for a full fan "FOGGING" spray with a forward projection and has a red shrink tube tip for identification NSN: 4730-01-632-0156.

Formit[®]-18-90-FOG (008353):

Allows for a 90 Degree "FOGGING" fan spray with a vertical projection and has a red shrink tube tip with an additional lack directional indicator for identification NSN: 6850-01-517-0963.

In addition, there are **Formits[®]** with differing tube lengths for specialized applications:

Formit[®]-29-360 (101321), **Formit[®]-36-360** (009131), **Formit[®]-48-360** with metal sleeve (009132)
NSN: 1560-01-658-8943, **Formit[®]-48-360** without metal sleeve (100424) NSN:4730-01-659-5461,

Formit[®]-48-Fan (008460) NSN: 4730-01-632-0157 (One Each).

Packaging:

12 assemblies per package.
