## SURFACE PREPARATION & AVIONICS CLEANERS

### SUR-PREP® AP-1

*Product description:*

## PAINT ADHESION PROMOTER

### APPLICATIONS

Sur-Prep® AP-1 can be used on radome polyurethane boots prior to topcoat application and application over composite parts to provide a continuous surface energy for painting.

The Sur-Prep® AP-1 aerosol can be used in conjunction with the **Formit®** extensions to provide targeted spray to areas that are difficult to reach but need to be coated

Sur-Prep® AP-1 is sprayed as a thin and wet film to dampen the substrate being sprayed. Application is performed using standard paint application methods, such as HVLP guns, air assisted airless spray guns, and electrostatic spray equipment.
